“Where we live must be clean, safe, organized, and beautiful, for national integrity, national pride, and for our bright future. This too is nation building”

His Majesty The King of Bhutan,
Royal Bhutan Flower Exhibition, April 1, 2015.

“Always watchful, His Majesty (Drukgyal Zhipa) would observe litter that blights our pristine environment, and express concerns on the growth of waste and their proper disposal”

His Majesty The King of Bhutan,
11th November 2015, Changlimithang, Thimphu

Logo symbolises:

1. The flower symbolizes the pure form of the nature in its original form.
2. Green color symbolizes the nature in its true color
3. Clean Bhutan indicates that Bhutan should be clean and every Bhutanese citizen should be responsible.

Foreword

Like most other developing nations, Bhutan is faced by many problems brought about by rapid urbanization; Like most developing countries, Bhutan is faced by many problems brought about by rapid urbanization; a major one being an increasingly large output of waste and improper disposal. In 2014, Thimphu, capital city of Bhutan produces 35 metric tonnes of waste every day. As of 2017, Thimphu alone produces around 51 tonnes of waste everyday (Thimphu Thromde 2017). According to Thimphu thromde it is estimated that 49% of Thimphu's total refuse is biodegradable organic waste; 25.3% is paper; 13.7% is plastics; and 3.6% is other type of waste. The capital's only designated dumping site, Memilakha Landfill was overflowing its capacity since 2002. This has lead to illegal dumping there and at other sites around Thimphu. In 2015, the landfill is being revamped with leachate extraction system.

One of our main objectives is to reduce waste at source and to practice sustainable consumption lifestyle and ultimately preventing waste going to the landfill. In 2017, Clean Bhutan conducted a total of 99 advocacy programs on "How to reduce waste at source?" reaching out to 16 Dzongkhags to 19,067 participants.

In the year 2017, Clean Bhutan had managed to conduct a total of 115 cleaning campaigns in 16 Dzongkhags, town and village areas with involvement of 4,431 volunteers.

Clean Bhutan is also working with the Waterkeeper Alliance to keep our fresh water free from waste pollution and other types of pollution.

Finally, we would like to thank all our donors, partner agencies, institutes individual contributors, members and volunteers for their continued support to achieve Zero Waste Bhutan.

TashiDelek.

Nedup Tshering
Executive Director

INTRODUCTION

Clean Bhutan was established on 6th February 2014. It was initiated as a cause to celebrate the 60th Birth Anniversary of His Majesty The Fourth King. After the instruction of The Prime Minister of Bhutan, on 11th November 2014, Clean Bhutan was registered as Civil Society Organization (CSO) with CSO Authority.

Clean Bhutan's aim is to advocate and sensitize the Bhutanese citizens about our behavior and habits to manage waste and help reduce waste generation. As Bhutan is beginning to experience rapid socio-economic development and waste is becoming a major concern. Therefore, Clean Bhutan's responsibility is to inform the people of Bhutan about the negative impacts on the environment and human health from waste through advocacy programs and develop mechanisms on how to manage and reduce waste at source.

Vision

Zero Waste Bhutan by 2030

Mission

To change the mindset of every Bhutanese to be responsible citizens and practice sustainable consumption by using available resources most efficiently

Strategy

Reduce Greenhouse Gas (GHG) emission from landfill and prevent river pollution from waste by Advocating Behavioral Change (ABC) on sustainable consumption lifestyle.

Long-term objective (2030)

Advocate Behavioral Change (ABC) on sustainable consumption lifestyle and prevent Bhutan from becoming a consumerist society.

Medium-term objective (2025)

Changing the mindset of all citizens to practice the 3R with Responsibility.

Short-term objective (2020)

Work with local government, municipality authorities and communities to manage waste more efficiently.

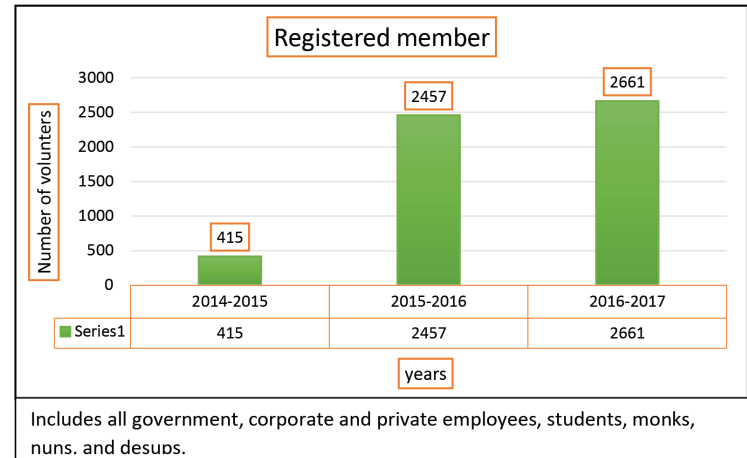

Registered Members

As of December 2017, clean Bhutan has a total of 5,533 registered members and has worked with more than 6,819 volunteers. The following are the responsibilities of the registered members:

1. If a members see anyone litter, it is the responsibility to educate the litterbugs.
2. Do not throw wrappers and any other waste out of a moving vehicle
3. Take back your own waste collection bag when travelling
4. Do not leave an area with your litter after using the area
5. Carry your own shopping bags when going out for shopping
6. Segregate your waste and manage it properly at home and anywhere
7. Educate your children/parents to be litter free and
8. Practice 3Rs and be a responsible citizen.

FOCAL INSTITUTE

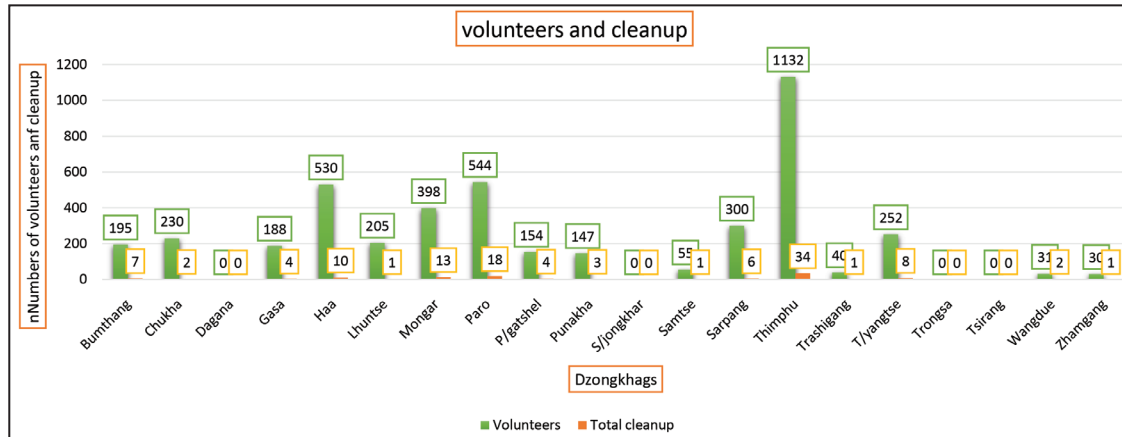

- Paro College of Education - Paro
- Samtse College of Education - Samtse
- College of Natural Resource – Wangdi Phodrang
- Sangchokhor Shedra Kilikhar Shedra - Paro
- River guides of Panbang - Zhemgang
- River guides of lotus adventures - Punakha

ACTIVITIES CARRIED OUT

Activities conducted were mainly focused on cleaning campaign and advocacy on waste management. The cleanup campaigns were carried out to achieve the vision of zero waste by getting rid of already existing litters and advocacy was conducted to prevent future waste generation by educating the society about waste management concepts for behavioral change.

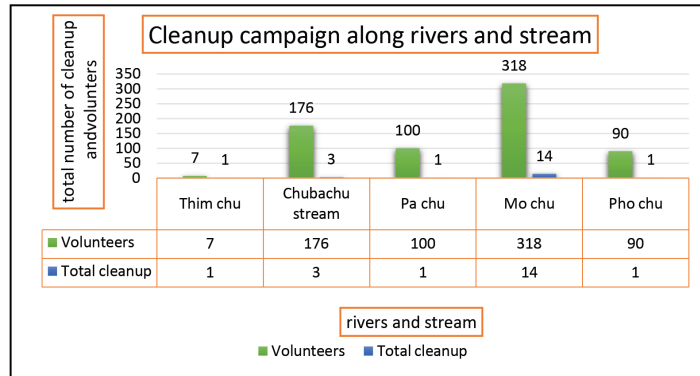

Cleaning campaign along town and villages - 2017

In the year 2017, Clean Bhutan had managed to conduct a total of 115 cleaning campaigns in 16 Dzongkhags along town and village areas with involvement of 4431 volunteers. In addition, a nationwide cleanup campaign being organized on 9th December 2017.

Clean up campaign along rivers and stream - 2017.

Clean Bhutan manage to conduct 20 cleanup program along four rivers and a stream during 2017 with total volunteers of 691.

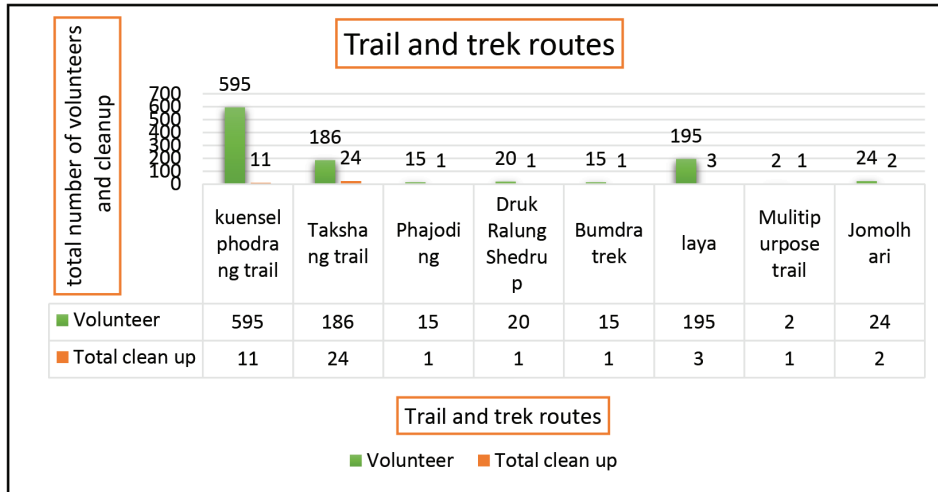

2017: monthly cleanup along Mo chu by green bag warriors.

22nd March 2017: Cleanup during World Water Day by Bhutan Red cross society in partnership with NEC, RSPN, Thromde and clean Bhutan.

Clean up campaign along Trek routes and trails – 2017

Total of 44 cleanup campaign along trail and trek routes being organized with total participants of 1052 volunteers.

14th-15th October 2017: Jomolhari trek route and base camp cleanup campaign.

ADVOCACY PROGRAM

Total of 99 advocacy being carried out in 16 Dzongkhags with total Participant of 19067 in 2017.

Waste & climate

Waste generation does not result in positive impacts on climate. Waste treatment and disposal can have both positive and negative climate impacts.(UNEP 2010)

Tshog Offering

At his monastery in Bhutan, Dzongsar Khyentse Rinpoche (DKR) hosts the world's most eco-friendly tshog offering, refusing to use plastic wrappings in favor of local, sustainable resources.(DKR June 29,2014)

Manage your own waste
Clean your brain and not the drains:
(Clean Bhutan Feb 2014)

Waste & drinking water

Landfills can contaminate drinking water if they are not properly constructed. Occupational risks exist at disposal facilities that are not well designed, run, or maintained.(WHO 2015)

“Where we live must be clean, safe, organized, and beautiful, for national integrity, national pride, and for our bright future. This too is nation building.”(His Majesty The King of Bhutan, Royal Flower Exhibition, April 1, 2015)

Waste sector emissions were estimated to account for 3-5% of total global anthropogenic emissions in 2005. (Bogner et al.)

PROJECT 1 – 2016/17

Bhutan Trust Fund for Environment Conservation (BT FEC)

A two year project on “Advocating Behavioral Change-Managing our own waste-Mongar and Trashigang ” in collaboration with local governments which commenced in the month of July, 2015. The project is supported by Bhutan Trust Fund for Environment Conservation with a sum of Nu 6.8 million, completed on June 2017.

12th June 2018: Advocacy program at Thangrong Gewog

Activity 1: Segregating waste from going to landfill

An advocacy program on how to manage our own waste and why it is important to segregate the waste has been organized in Mongar, Trashigang and Lhuntse. Three MRF (Material Recovery Facility) has been constructed at Gangola(Chali gewog) , Kidheykhar shedra and Royal Bhutan Police coloney under Mongar Dzongkhag to reduce waste going to landfill.

Activity 2: Clean river system and signage

During the cleanup campaign along the river, there were not much of habitants living nearby. Therefore an advocating program was held on clean water sources. A cartoon clip titled “Clean Water for Next Generation” was aired on BBS national TV.

Activity 3: Action plan for Mongar and Trashigang

- 30(thirty) stakeholder meetings with the Dzongkhag official ,gewog official and local communities of three dzongkhags
- 33 advocacy and training program to educate the local communities in three dzongkhags

Activity 4: Advocacy material production

- The two minute advocacy cartoon clip, “clean water for next generation” was aired on BBS TV for the whole month of February and Car stickers have been printed and distributed to three dzongkhag and advocacy program for taxi driver and public bus driver.

PROJECT 2 (2017/18)

Small Grants Programme/Global Environment Project (SGP/GEF UNDP)

An eighteen months project on “Waste management system for Trashiyangtse community” from December 2016 to February 2018. The project is funded by small grant project, UNDP/GEF with a sum of Nu 2.8 million.

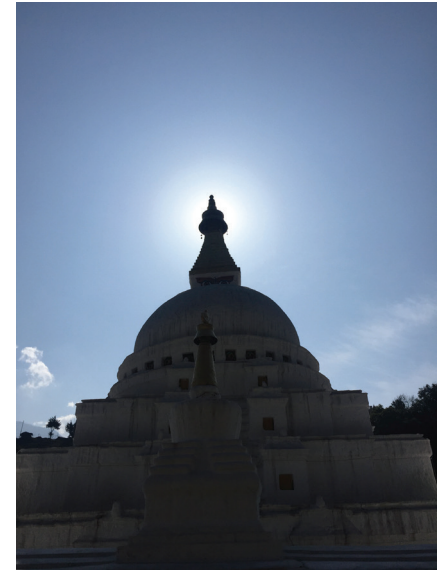

Activities

- 18 meetings and training program was organized to the stakeholder/ communities and school children where more than 1000 participants attended the program and able to do 14 cleanup program during festival and official gathering.

9th December 2016: nationwide cleanup program at Trashiyangtse

- The construction of biodegradable waste composing unit and segregation shed has been completed. Organic waste is collected by national seed center.
- Production of an animated short video on waste management in Trashiyangtse has produced and air on national TV.
- A local waste management committee has been formed with six member and drafted by law has been presented to the committee member and the stakeholders/community for implementation and to institutionalize revolving fund for long term sustainability.
- 5 numbers of CCTV is installed within the Throm area to monitor the litterbugs and Waste recovery shed has been constructed with four units, i.e. e-waste, plastic, pet bottles and cartoon.
- Baler machine has been purchased so that the pet bottles collected at the shed could be sold for recycling
- 3 cooking stove has been purchased and handed over to Dzongkhag administration to reduce the use of fuel wood at Chorten Kora and Three signage is installed i.e. segregation shed, composting pit and at town.

Small Grants
Programme

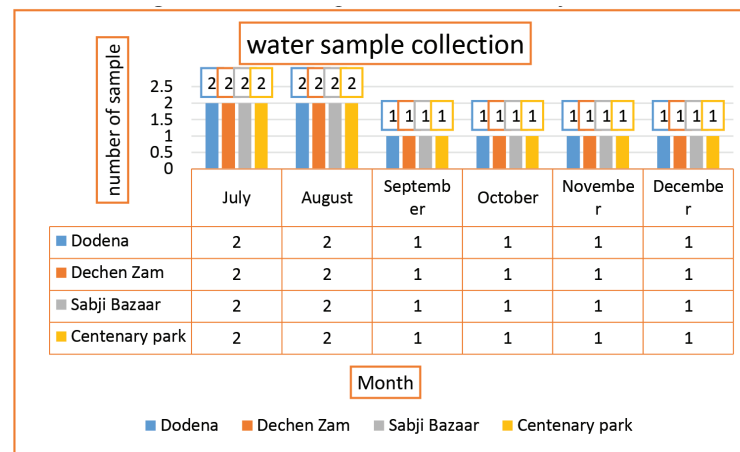

PROJECT 3 (2017)

Waterkeeper Alliance:

1) Thim chu WaterKeeper

November 2015: A project on Thim Chu Waterkeepers implemented by Clean Bhutan in collaboration with Waterkeepers Alliance partnership with National Environment Commission and Department of Hydro-Met Services. The project area is along Thim Chu starting from Dodena to Damchu. The objective of the project is to protect the river from pollution and to monitor the water quality. Provide data to public and government for appropriate decision making to protect Thim Chhu pollution.

- Waterkeeper Alliance team made its third visit to Bhutan to help support the growing Bhutanese network with water monitoring equipment and training. They held the training from 17th -21st of July 2017.
- The Bhutan Waterkeeper team collects sample every other week, collecting a total of 24 samples till the end of the year.
- We were honored to provide the first environmental law discussion and field training to the 25 students of Jigme Singye Wangchuck School of Law ,who make up the inaugural class of Bhutan's very first law school.

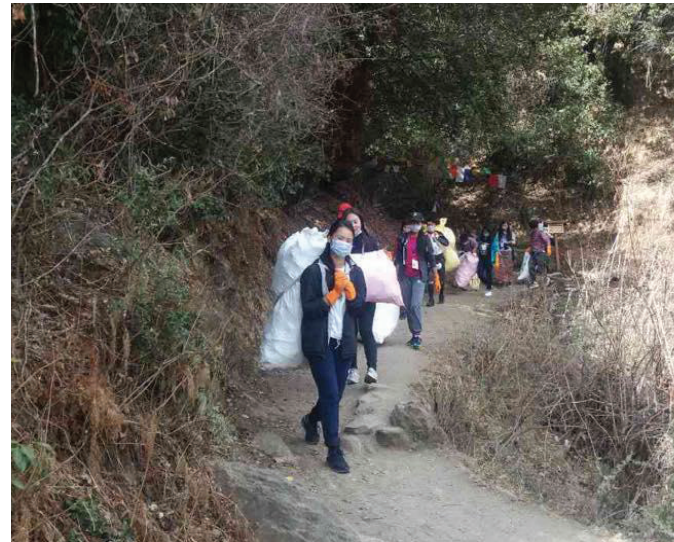

17-22 July 2017: Training on water monitoring

2) Punatsang chhu waterkeeper

October 23, 2017: Punatsang chu is the newest addition to Bhutan Waterkeeper Movement. The Punatshang chu is one of Bhutans four major river basins, the punatshang chu is also the main habitat of the critically endangered White Bellied Heron now under massive threat from the installation of two hydropower projects along the river.

Mr. kesang Lhendup, a Manager and river guide at Lotus Adventures Bhutan, will oversee the waterkeeper organization and its volunteer work force of river guides and partners and work with Clean Bhutan and Wangchu WaterKeeper in developing its outreach, awareness and advocacy program.

PROJECT 4 (2016/17)

Taktsang Trail Clean up Program

Taktsang Monastery is Bhutan's most iconic landmark and religious site. With the increase number of tourists and pilgrim visitors to Taktsang, Clean Bhutan has initiated clean-up program along Taktsang trail.

We have employed 5 people with two ponies to maintain a clean trail to Taktsang. During the peak tourist season they clean the trail on weekly basis and twice a month in off season. Until today, we received small contribution from Tourism Council of Bhutan and Norbu Bhutan to conduct weekly clean up and emptying bins which was installed along Taktsang route.

Clean Bhutan's member of Paro College of Education students also organize several clean-up campaign along the Taktsang trail.

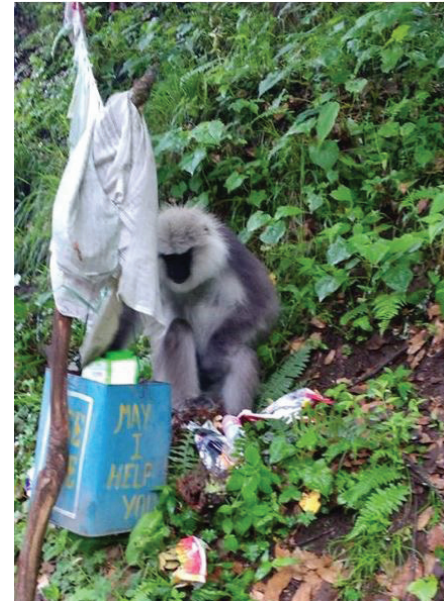

CHALLENGES

- Understanding on how waste have negative impact on human health, local environment, all sentient beings especially the ground water, drinking water sources, rivers and streams.
- People throw their trash everywhere especially in the places where no one can see it. Most common places are below the road, forest and rivers and streams.
- Litterbugs in towns and villages and trails to remote lhakhangs
- Highway litterbugs- trash by travelers, vehicle drivers and public transport
- Trash left along trekking routes

Landfill Leachate

*Small Dustbins
“Who is responsible
to empty it?”*

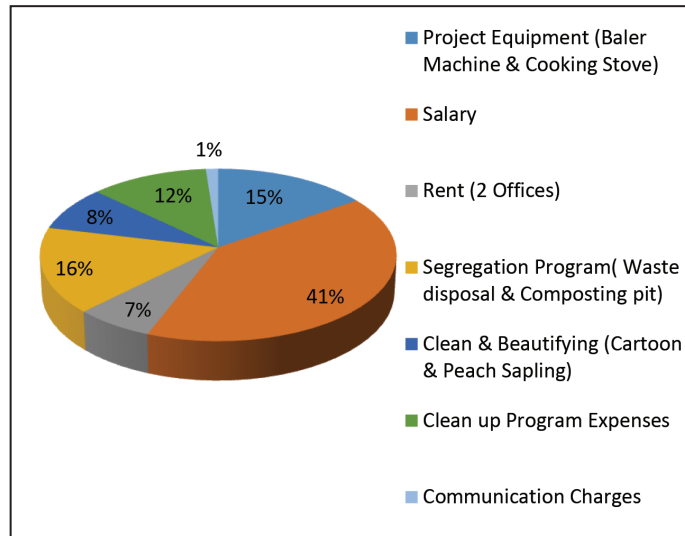

ACHIEVEMENTS FOR 2017

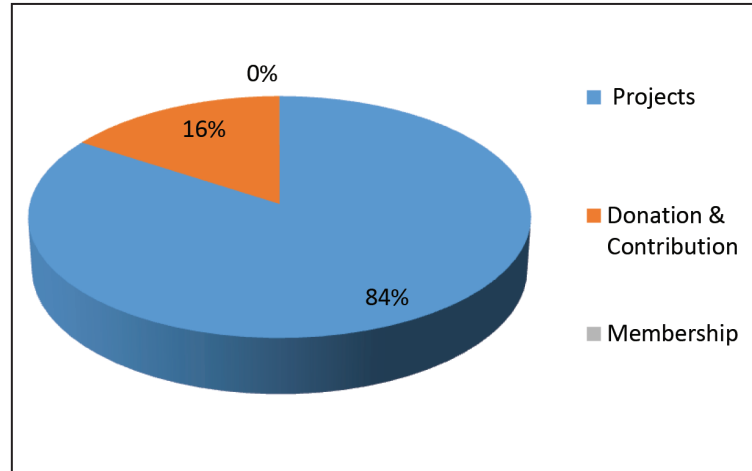

- A total of 115 cleaning campaigns in 16 Dzongkhags with 4,431 volunteers. In addition, a nationwide cleanup campaign was held on 9th December 2017.
- A total of 99 advocacy program was organized 16 Dzongkhags with 19,067 participants including villages, towns and schools.
- To improve the existing waste management system of Taktsang trail, Clean Bhutan employed 4 people and 3 ponies to clean up the trail once a week during peak tourist season and twice a month during off-season. This was a part of advocacy and clean up program under PPP model.
- Training of Paro College of Education students to become Trainers of Training (TOT) on waste management to the school students and during their Teaching Practice to remote schools.
- A total of 5,533 registered member and the year 2017 having the highest number of registered members i.e. 2,661 members
- Clean Bhutan logo has been registered with the Department of Intellectual Property, Ministry of Economic Affairs, Thimphu as copy right
- In Bhutan, Clean Bhutan is the local partner of WaterKeeper Alliances USA. A memorandum of understanding (MOU) has been signed between the two organizations.
- Established a basic water quality data for Thimphu river (Thim Chu).
- A new unit has been established on “Development of Weavers’ skill” on how to weave products out of plastic and tetrapac waste. By 2018, the skills with be imparted to all interested entrepreneur especially women self-help groups to generate additional income out of waste and reduce waste from going to the landfill in all 20 Dzongkhags.
